Audit terms

VERSION 1.0

These terms apply when a business books the fixed-price codebase audit on inspectedbymarko.com. They set out what the audit covers, how we access and protect your code, how we use AI tools, what you pay, and the limits of what an audit can tell you. Save or print a copy: our booking confirmation repeats the version you accepted.

01

Who we are, and who can book

- 1.1 The audit is provided by **OneCodeToRuleAll d.o.o. (OCTRA, "we", "us")**, Sindelićeva 6, 19000 Zaječar, Serbia, registered with the Serbian Business Registers Agency under registration number 21564516, tax identification number (PIB) 111898813. Marko Živić runs every audit.
- 1.2 The audit is sold only to businesses. By booking, you confirm that you book for your company, that you are authorized to bind it, and that it is not acting as a consumer. "You" means that company.

02

How the contract is made

- 2.1 You fill in the booking form. Before you send it, you can check and correct every field.
- 2.2 When you send it, you accept these terms, and we send you a booking confirmation at once, in a separate email. The confirmation means we received your booking. It is not yet our acceptance.
- 2.3 **The contract is made when you receive our email confirming a start date, with our invoice.** Until then, either of us can walk away, and we may propose a different scope if your repository does not fit the audit as booked.
- 2.4 The contract consists of your booking, our confirmation of the start date, and these terms. It is written in English. We have not signed up to any code of conduct.

03

What the audit covers

- 3.1 One repository. Its size defines how much the audit will cost.
- 3.2 We check it for:
 1. security vulnerabilities;
 2. database performance;
 3. backend structure;
 4. frontend structure; and
 5. architecture.
- 3.3 We work from the code and configuration in the repository you give us access to. We use automated tools and AI tools (section 8), and Marko and his team check every finding before it reaches your report.

04

What the audit does not cover

- The audit does not include:
1. testing of running systems, such as penetration testing, load testing or scanning of live environments, unless we agree it in writing first;
 2. infrastructure and cloud accounts, except configuration stored in the repository;
 3. the internal code of third-party dependencies; we check the versions you use against known vulnerabilities;

4. any second repository, or code we are not given;
5. legal or regulatory compliance, or any certification or attestation;
6. fixing anything. We quote fixes separately, if you want them.

05

What you receive, and when

- 5.1 A written report with every finding ranked by severity, and a fix plan.
- 5.2 **We deliver within five working days of the start date**, counted in Serbia. If your access does not work on the start date, the five working days start when it does.

06

Price, payment and VAT

- 6.1 The fee will be defined by a quote based on repository size and complexity of audit. It is the price shown on Work with me when you booked.
- 6.2 We invoice your company from OCTRA with the confirmed start date. **You pay by bank transfer in US dollars, before the start date.** You pay your own bank's charges and any intermediary bank's charges, so that we receive the full amount.
- 6.3 If the fee has not arrived by the start date, the booking lapses, and we offer you the next free date.
- 6.4 **Prices exclude applicable tax.** If your company is established in the EU or the United Kingdom, our invoice carries no Serbian VAT, and you account for VAT under the reverse charge. Give us your VAT ID in the booking form. If your company is established in Serbia, we add Serbian VAT where the law requires it. If the law requires you to withhold tax from our fee, you pay the additional amount needed for us to receive the full fee. We give you the tax forms you reasonably ask for, such as Form W-8BEN-E.

07

Access to your code

- 7.1 **Read-only, one repository, with an end date.** You give us read-only access to the one repository, in the way we agree with you. The default is a fine-grained GitHub access token, or a GitHub App, limited to that repository with read-only permission and an expiry date no later than **7 days** after the delivery date. A code archive sent through a secure link also works. We do not accept credentials that never expire.
- 7.2 **No live systems.** We do not access your production systems, databases, cloud accounts or live environments, unless we agree it in writing first.
- 7.3 **Secrets.** Remove production secrets and credentials from the repository before you give us access, or rotate them after the audit. Any secret we find is reported as a finding. We never use it.
- 7.4 **Your authority.** You confirm that your company owns the code or is authorized to give us access to it and to have it audited, including code

licensed from third parties. You are responsible for any permission a third party's license or contract requires.

08

AI tools

- 8.1 We use AI tools during the audit. At the date of these terms, that is Anthropic's Claude, including Claude Code, used under Anthropic's commercial terms. We tell you before the start date if we add another tool, and you may refuse it.
- 8.2 **Under those commercial terms, the provider does not train models on your code.** We never use a consumer AI plan for your code.
- 8.3 We run Claude Code on our own computers under Anthropic's Commercial Terms, with no cloud sessions, and with feedback, bug reports and chat ratings switched off. Under those terms, at the date of these terms, Anthropic deletes inputs and outputs within 30 days, except content flagged under its usage policy, which it may keep for up to 2 years, or where the law requires longer.
- 8.4 AI output can be wrong. A person checks every finding before it reaches your report, and the findings are our responsibility.
- 8.5 If you do not want AI tools used on your code, tell us before you book. The audit may then not be available at this price or turnaround.

09

Confidentiality

- 9.1 Your code, the report, and everything you share with us about your business are confidential. We use them only to carry out the audit and any follow-on work you order.
- 9.2 Only Marko and his team, each bound to OCTRA by written confidentiality duties, work on your code.
- 9.3 **We never show your code, your findings or your company in a video, post or talk, or anywhere on the channel, unless you agree in writing.**
- 9.4 These duties do not cover information that is public through no fault of ours, that we lawfully knew before, that we lawfully receive from someone else without a duty of confidentiality, or that we develop independently. If the law requires us to disclose something, we disclose only what is required and, where the law allows, tell you first.
- 9.5 These duties last for five years after delivery, and for your code and trade secrets for as long as they remain confidential.

10

Deletion

- 10.1 Within **10 working days** after we deliver the report, or after a booking is canceled, we delete every copy of your code from our computers and tools, including the AI tools' session records kept on our computers. Revoke our access when you receive the report; we remind you to.

- 10.2 We keep the report, our notes on the findings, the booking, the invoice and our correspondence, under the confidentiality duties in section 9. We keep accounting records for as long as Serbian law requires.
- 10.3 Ask us and we confirm the deletion in writing.

11

Personal data in your code

- 11.1 The audit is not designed to process personal data. Do not include it. If your repository still contains personal data, such as seed data, test fixtures, logs or backups, we process it **only on your company's behalf, as its processor**, and only to carry out the audit.
- 11.2 For that data:
1. we act only on your documented instructions, which are these terms, including on transfers outside the EU and the UK, and we tell you at once if we think an instruction breaks data protection law;
 2. everyone who works on it is bound by confidentiality duties;
 3. we protect it with encrypted computers, two-factor authentication and access limited to the people working on your audit;
 4. **you authorize the AI provider in section 8 as our sub-processor**. It processes data in the United States under Standard Contractual Clauses or the EU-U.S. Data Privacy Framework. We tell you before the start date about any other sub-processor, and you may object. We bind each sub-processor to the same duties in writing and stay liable to you for it;
 5. we help you respond to requests from the people the data is about, and with your own duties on security, breaches and impact assessments, as far as the audit allows;
 6. we tell you without undue delay, and within 72 hours at the latest, after we become aware of a breach affecting the data;
 7. we delete it under section 10; and
 8. we give you the information you need to show that these duties are met, and allow and contribute to audits, including inspections, by you or an auditor you appoint.
- 11.3 The subject of the processing is the audit; it lasts until deletion under section 10; and the data concerns whoever your repository's data happens to concern, typically names, contact details and account records of your users, customers and staff. You remain the controller and are responsible for having a lawful basis to share it with us.
- 11.4 Where the GDPR or the UK GDPR governs your sharing of personal data with us, the EU Standard Contractual Clauses (Module Two, controller to processor, Commission Implementing Decision (EU) 2021/914) apply, incorporated by reference, with this section and section 3 as their annexes and the security measures in 11.2(3) as their Annex II. Clause 7 does not apply; under Clause 9, option 2 applies with the notice in 11.2(4); the optional wording in Clause 11 does not apply; under

Clauses 17 and 18, the law and the courts of Ireland apply; and the competent supervisory authority is the one where your company is established. For the United Kingdom, the UK Addendum to those clauses applies in the same way.

12**Moving or canceling**

- 12.1 You may move the start date by telling us at least **3 working days** before it. We offer the next free date.
- 12.2 **You may cancel at any time before the start date and get a full refund** of anything you paid.
- 12.3 **Once work has started, the fee is not refundable.** If you stop the audit after it starts, we deliver what we have finished.
- 12.4 If we cannot start or finish on time, for example because of illness, we offer you a new date or a full refund. You choose.

13**What an audit can and cannot tell you**

- 13.1 We carry out the audit with reasonable skill and care, following the method in section 3.
- 13.2 **An audit checks the code you give us, at one point in time. It cannot find every vulnerability or every performance problem.** We do not promise that your code is secure, compliant or free of defects after the audit. What you fix, and how you run your systems, stay your decisions and your responsibility.
- 13.3 The report is technical advice. It is not legal advice, and it is not a certification or an attestation.
- 13.4 **The report is for your company.** You may share it with your shareholders, lenders, prospective buyers, auditors and advisers. Our duties run only to your company: tell anyone you share it with that it is for their information and that we accept no duty to them.
- 13.5 **If the report falls short of these terms,** for example because it misses an area in section 3.2, tell us within 30 days of delivery. We correct it free of charge. If we cannot, we refund the fee.

14**Liability**

- 14.1 Nothing in these terms limits liability for intent or gross negligence, for fraud, for death or personal injury, or any other liability that cannot be limited under the governing law.
- 14.2 We are not liable for loss of profit, revenue or business, or for any indirect or consequential loss. We are not liable for the consequences of a vulnerability or defect in your code, whether or not the report identifies it, except to the extent our breach of these terms caused them.
- 14.3 **Our total liability for the audit is limited to the fee you paid.** For a breach of section 9, 10 or 11, the limit is **three times the fee** instead.

15

Who owns what

- 15.1 Your code stays yours. **The report belongs to your company** once the fee is paid.
- 15.2 We keep the rights in our methods, tools, checklists, skills and templates, and in the general knowledge we gain. We may reuse them, but never your code or your confidential information.

16

Changes to these terms

- We may publish a new version of these terms. **The version you accepted applies to your audit.** A new version applies only to bookings made after it is published.

17

Law and disputes

- 17.1 The law of the Republic of Serbia governs these terms and any dispute about them, excluding its conflict-of-laws rules and the United Nations Convention on Contracts for the International Sale of Goods.
- 17.2 We first try in good faith to settle any dispute between us for 30 days. After that, **the Commercial Court in Zaječar, Serbia (Privredni sud u Zaječaru), has exclusive jurisdiction.** Either of us may seek urgent interim measures from any competent court.

18

General

- 18.1 These terms, your booking and our confirmation are the whole agreement about the audit. Any fixes or other work you order after the audit are agreed separately in writing.
- 18.2 If a court finds part of these terms invalid, the rest stays in force. Not enforcing a right is not a waiver of it.
- 18.3 Neither of us may transfer this agreement without the other's written consent, except to a company that takes over the business it relates to and all its duties.
- 18.4 Notices go by email: to us at marko@inspectedbymarko.com, to you at the work email in your booking.
